Example chapter

Table of Contents

1. Example chapter section

With some example text. And folowed by an example sub section.

1.1. Example section

1.1.1. example sub section

With some test text here.

1.1.2. example dynamic includes section

Listing 1. exampleJSON.txt

```
{
    "glossary": {
        "title": "example glossary",
        "GlossDiv": {
            "title": "S",
            "GlossList": {
                "GlossEntry": {
                    "ID": "SGML",
                    "SortAs": "SGML",
                    "GlossTerm": "Standard Generalized Markup Language",
                    "Acronym": "SGML",
                    "Abbrev": "ISO 8879:1986",
                    "GlossDef": {
                        "para": "A meta-markup language, used to create markup
languages such as DocBook.",
                        "GlossSeeAlso": ["GML", "XML"]
                    },
                    "GlossSee": "markup"
                }
            }
        }
    }
}
```

Listing 2. exampleinclude.txt

```
This is an example raw text file
the file contains just text and could be a log file or output from some tests
a list of these can be compiled and automatically pulled in
It can also be source code or JSON or siilar and can then even be highlighted by
syntax.
```
